

You have just purchased a high energy storage device from EVUL Empire Racing... This device has NO WARRANTY and EVUL Empire Racing assumes no liability whatsoever in any damage that may occur in it's use.

The MICRO STANDARD XTREME capacitors have a maximum working voltage. If the applied voltage is higher than the rating of the capacitor, failure **WILL** occur. It is the users responsibility to ensure the proper applied voltage to his/her capacitor pack.

The voltage ranges are listed below:

1s	5.5 VDC
2s	8.6 VDC
3s	12.6 VDC
4s	16.8 VDC
6s	25.2 VDC
8s	33.6 VDC

The 6s and 8s Xtreme capacitor packs are very powerful when fully charged. To charge them properly you must charge to half voltage rating, wait 2 minutes then charge to the rated voltage for final use. This will ensure the capacitor will not be stressed during a charge cycle from a zero charge state.
